PROJECTS

SplitZees (Rails, PostgreSQL, JavaScript, React.js, Redux)

[LIVE DEMO](#) | [GITHUB](#)

A full stack, single page application to track and manage expenses with friends, inspired by Splitwise.

- Incorporated ActiveRecord relation modules with method chaining, and eager loading to prevent N+1 queries
- Hosted pdf and image files in the cloud with AWS S3, improving the application's scalability
- Implemented Flux architecture in React.js to render single page view for seamless user experience
- Applied RESTful JSON API renders with JBuilder to create different slices of state for Redux store

Memory (JavaScript, React.js)

[LIVE DEMO](#) | [GITHUB](#)

A browse-based match the card game to test your memory and concentration

- Built multiple levels of inheritance for card, deck and game class, utilizing object oriented design
- Leveraged CSS transition and styling to render different card layout and animation dependent on game mode
- Deployed React modal to trigger user input and transition from game play to completion

DOM-only (JavaScript)

[LIVE DEMO](#) | [GITHUB](#)

A DOM manipulation library to manage AJAX requests, event handling, DOM traversal and manipulation by using the native DOM API and vanilla JavaScript

- Applied XMLHttpRequest to retrieve data from a server and update page with success callback
- Attached event handler on DOM nodes to invoke callback functions from the manipulation library

EXPERIENCE

04/2014 – 09/2015

MidOcean Credit Partners; New York, NY
